

# ERGONOMIC KEYBOARD

## ABSTRACT

5

10

An ergonomic keyboard includes a base and a plurality of keys that is further arranged into a plurality of adjacent key rows. The key rows having letter keys and numeral keys are equal-spaced arranged on the base to form adjacent concentric arcs with a concentric center located opposing to a user side of the keyboard. Further, the letter keys and the numeral keys are identically shaped and are evenly arranged into the adjacent key rows.
